Re: Policies for CY 2021 for Office/Outpatient E/M Visits in the CY 2020 Medicare Physician Fee Schedule Proposed Rule

Dear Administrator Verma:

On behalf of the undersigned 53 organizations, we write to voice our strong opposition to the Centers for Medicare & Medicaid Services' (CMS) proposal, as set forth in the calendar year (CY) 2020 Medicare Physician Fee Schedule proposed rule, not to incorporate into the global codes the adjusted values for the revised office/outpatient evaluation & management (E/M) codes. By failing to adopt all the American Medical Association/Specialty Society Relative Value Scale Update Committee (RUC)-recommended work and time values for the revised office visit E/M codes for CY 2021, including the recommended adjustments to the 10- and 90-day global codes, CMS improperly proposes to implement these values in an arbitrary, piecemeal fashion.

It is inappropriate for CMS to move forward with the proposal to not apply the RUC-recommended changes to global codes. If CMS finalizes the proposal to adjust the office/outpatient E/M code values, the agency <u>must</u> apply these updated values to the global codes. It is imperative that CMS take this crucial step because to do otherwise will:

- Disrupt the relativity in the fee schedule: Applying the RUC-recommended E/M values to stand-alone E/Ms, but not to the E/Ms that are included in the global surgical package since the inception of the fee schedule, will result in disrupting the relativity between codes across the Medicare physician fee schedule. Changing the values for some E/M services, but not for others, disrupts this relativity, which was mandated by Congress, established in 1992, and refined over the past 27 years. Indeed, since the inception of the fee schedule, E/M codes have been revalued three times in 1997 (after the first five-year review, in 2007 (after the third five-year review) and in 2011 (after CMS eliminated consult codes and moved work RVUs into the office visit codes). When the payments for new and established office visits were increased in these instances, CMS also increased the bundled payments for these post-operative visits in the global period.
- *Create specialty differentials*: Per the Medicare statute, CMS is prohibited from paying physicians differently for the same work, and the "Secretary may not vary the . . . number of relative value units for a physicians' service based on whether the physician furnishing

the service is a specialist or based on the type of specialty of the physician." Failing to adjust the global codes is tantamount to paying some doctors less for providing the same E/M services, in violation of the law.

- Run afoul of section 523(a) of MACRA: CMS points to the ongoing global code data collection effort as a reason for not applying the RUC-recommended changes to office visit E/M codes to global codes. In addition, the Agency states that it is required to update global code values based on objective data on all of the resources used to furnish the services included in the global package. These arguments conflate two separate issues. The issue that CMS raises regarding MACRA legislation is not related to maintaining relativity across the fee schedule based on current data in the CMS work/time file. In fact, section 523(a) specifically authorizes CMS to make adjustments to surgical services, notwithstanding the mandate to concomitantly undertake the MACRA-mandated global code data collection project.
- Ignore recommendations endorsed by nearly all medical specialties: The RUC, which represents the entire medical profession, voted overwhelmingly (27-1) to recommend that the full increase of work and physician time for office visits be incorporated into the global periods for each CPT code with a global period of 10-day, 90-day and MMM (maternity). The RUC also recommended that the practice expense inputs should be modified for the office visits within the global periods.

Again, we strongly urge CMS not to finalize a policy that fails to apply the RUC-recommended changes to <u>both</u> stand-alone office visit E/M codes <u>and</u> the E/M component of the global codes. Our organizations will submit more detailed comment letters prior to the comment deadline, but the gravity of this particular proposal warrants an immediate response.

Thank you for your consideration of these comments, and we welcome continued dialogue with CMS on this critical issue.

Sincerely,
